

WHY CHOOSE A NANOFIL™ SYRINGE?

PRECISE, LOW-VOLUME INJECTIONS & ZERO DEAD VOLUME

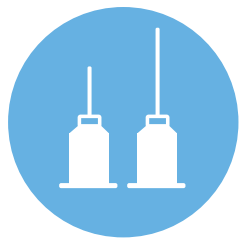

Low Dead Volume

The NanoFil™ design offers the benefit of zero dead volume for optimal precision

Needle Versatility

NanoFil™ has a patented gasket design that universally accepts all NanoFil™ needles.

Variety of Syringe Injection Tip Options

Delicate serrations help prevent tissue damage when clamping blood vessels or other structures.

Smallest Available Needle Sizes for Sensitive Applications (26-36G)

Assess the effectiveness of hemostasis after procedures.

Unique Tri-Beveled Needle Designed for Minimal Trauma

Use for dissection to separate tissues. Helpful during microdissection or microsurgery.
